

## Knowledge Management Solutions

Brainware is the leading name in knowledge management in India today, offering services ranging from education systems to software development and web services.

Brainware has led the field in quality education for the last 18 years. Today it offers a range of knowledge solutions including certificate courses, post-graduate diploma programmes, graduate and post-graduate degree courses, corporate packages, soft skills training, e-learning modules, multi-media based interactive learning CDs and technical publications.

In terms of the range of services offered, as also in respect of the quality and professional expertise involved, Brainware is unique in the country.

Brainware's knowledge management solutions are closely focussed on providing participants with finer career skills, thus enabling more productive and rewarding futures.

From its beginnings in 1991 as a provider of affordable quality computer training at a time when such services were expensive and cumbersome, Brainware today has successfully created a distinct identity for itself as a comprehensive source of knowledge management solutions. This is expressed in terms of the wide range of quality career skills / courses it offers today: software, hardware, networking, web-design, multimedia, financial accounting, language and soft skills, and management education.

Brainware's knowledge management solutions thus offer an integrated range of programmes, which cuts across different age groups, occupations and requirements. School, college and university students, aspiring entrants in the job market and senior management executives are equally empowered by Brainware's customized knowledge solutions.

Stability, experience and goodwill: Brainware has built its reputation through a fierce commitment to excellence over nearly two decades. It now has nearly 100 centres spread across the country, time-tested excellence in courseware design and administration, a huge professional team, superlative infrastructure, a pro-active research and development wing, and a 40,000 sq. ft. corporate office in the heart of India's fastest growing IT location: Salt Lake Sector V.

But more than anything else, the success of the Brainware story is in the 100,000 Brainware students who are today a major presence in the IT world internationally and are proud to call themselves part of the Brainware world.

Brainware has maintained its excellence in its products by creating a synergy between knowledge and praxis, by ensuring that its professional creative team is involved at every stage up to the final delivery of the product in the classroom or laboratory.

At Brainware you learn from those that actually execute the projects; from multimedia to web, from interactive learning modules to e-commerce portals, there is a unique harmony between design and delivery.

At Brainware, the creative professional carries back the experience of the classroom again to the designing table. At Brainware, the struggle for excellence is continuous.
